

Smart Cleaning Devices

Consent to Participate

Purpose of the Survey

This survey is being conducted to understand participants' knowledge and perceptions of different Internet of Things (IoT) devices and application domains, as well as their awareness of related privacy and security concerns.

Data Being Collected

We will ask for basic demographic information (such as age range and region) along with your responses to the main survey questions.

Voluntary Participation

Your participation is completely voluntary. You may choose not to answer any question or exit the survey at any time.

Anonymity and Confidentiality

Your responses will remain anonymous and confidential. No personally identifiable information will be collected or shared.

Questions or Concerns

If you have any questions about this survey, please contact

Md Ahnaf - mxa230196@utdallas.edu

Anamika Das - axd240045@utdallas.edu

Tarikul Islam - tarikulcse14@gmail.com

Consent Statement

By clicking "**Next**" and continuing with this survey, you indicate that you are at least [*minimum age, e.g., 18 years old*], have read the above information, and **agree to participate**.

No direct personally identifiable information (PII) will be collected.

Section: Demographic Profile

1. What is your age range?

Mark only one oval.

☐ Under 18

☐ 18 - 24

☐ 25 - 34

☐ 35 - 44

☐ 45 - 54

☐ 55 - 64

☐ 65 or older

2. Which geographical area do you reside in?

Mark only one oval.

☐ North America

☐ South America

☐ Europe

☐ Africa

☐ Asia

☐ Australia/Oceania

☐ Middle East

☐ Other: _____

Section: Awareness and Understanding

3. Q1. What is your understanding of the term "**Internet of Things (IoT)**"?

Mark only one oval.

☐ Devices connected to the internet that collect and share data

☐ A network of computers communicating via a centralized server

☐ A system of physical devices without internet connectivity

☐ Not sure

4. Q2. What is your understanding of **Cyber-Physical Systems (CPS)**?

Mark only one oval.

- ☐ Systems where physical processes are controlled or monitored by computer-based algorithms
- ☐ Computers that simulate physical processes without any real-world data
- ☐ Devices that only communicate between each other locally
- ☐ Not sure

5. Q3 . What types of data do you think **IoT** and **CPS** devices typically collect? (*Select all that apply*)

Check all that apply.

- ☐ Personal identifiers (name, address, etc.)
- ☐ Location data
- ☐ Health and fitness data
- ☐ Environmental data (temperature, humidity, etc.)
- ☐ Behavioral data (habits, patterns)
- ☐ Other: _____

6. Q4. How do you think data collected by **IoT** and **CPS** devices is used? (*Select all that apply*)

Check all that apply.

- ☐ To improve device functionality and performance
- ☐ To share with third parties for advertising or marketing purposes
- ☐ To enhance user experience by personalizing services
- ☐ I don't know

Section: Privacy Perceptions

7. Q5. What privacy concerns, if any, do you have regarding **IoT** and **CPS** devices?
(Select all that apply)

Check all that apply.

- ☐ Data being shared without consent
- ☐ Security risks of unauthorized data access or breaches
- ☐ Loss of personal control over collected data
- ☐ Unclear data storage practices or retention
- ☐ Other: _____

8. Q6. Do you think **IoT** and **CPS** devices should inform users about what data is being collected and how it is used?

Mark only one oval.

- ☐ Yes, always
- ☐ Yes, but it should depend on the device or context
- ☐ No, it's not necessary for users to be informed
- ☐ Not sure

9. Q7. How concerned are you about the security of your personal data when using **IoT** and **CPS** devices?

Mark only one oval.

- ☐ Very concerned
- ☐ Somewhat concerned
- ☐ Not concerned at all
- ☐ Not sure

10. Q8. What measures do you believe should be taken to protect privacy in **IoT** and **CPS** systems? (Select all that apply)

Check all that apply.

- ☐ Encryption of data during transmission or storage
- ☐ User control over what data is stored or collected
- ☐ User authentication for accessing devices or data
- ☐ Regular software updates/patches for vulnerabilities
- ☐ Strict access controls and auditing of data usage
- ☐ I don't know

11. Q9. What does **GDPR** stand for?

Mark only one oval.

- ☐ General Data Protection Regulation
- ☐ Global Digital Privacy Rules
- ☐ Government Data Privacy Regulation
- ☐ Not sure

12. Q10. What does **HIPAA** protect?

Mark only one oval.

- ☐ Medical and health-related information
- ☐ Home security footage
- ☐ Financial account details
- ☐ Not sure

13. Q11. Are you aware of any regulations or standards protecting privacy in **IoT** and **CPS** systems (e.g., GDPR, HIPAA)?

Mark only one oval.

- ☐ Yes, I am aware of regulations like GDPR, HIPAA
- ☐ I have heard of them but don't know much about them
- ☐ No, I am not familiar with them
- ☐ Other: _____

Information on GDPR and HIPAA

What is GDPR?

→ A law in Europe that protects people's personal data and privacy.

Why is GDPR important?

→ It makes sure companies don't misuse or share your personal information without permission.

What kind of data does GDPR protect?

→ Your name, email, phone number, address, photos, and even your location.

Can a company collect your data without asking?

→ No. Under GDPR, they must ask for your clear permission first.

Can you ask a company to delete your data?

→ Yes. It's called the "right to be forgotten."

What is HIPAA?

→ A U.S. law that protects your health information and privacy.

What kind of information does HIPAA protect?

→ Your medical records, test results, doctor visits, and health insurance details.

Can your doctor share your health information with anyone?

→ No. They must keep it private unless you say it's okay.

Why is HIPAA important?

→ It keeps your personal health details safe from being misused or leaked.

Can you see your own medical records?

→ Yes. HIPAA gives you the right to view and get copies of them. GDPR (General Data Protection Regulation)

14. Q12 . Would you be willing to share personal data with **IoT** and **CPS** devices if there was a clear benefit to you (e.g., better services, personalization)?

Mark only one oval.

- ☐ Yes, if the benefits are significant
- ☐ Yes, but I need to know how my data will be protected
- ☐ No, I prefer not to share my personal data
- ☐ Not sure

15. Q13. What would make you trust **IoT** and **CPS** devices more regarding privacy?

Mark only one oval.

- ☐ Transparency about data collection and usage
- ☐ Control over data sharing and access settings
- ☐ Clear privacy policies with user-friendly knowledge
- ☐ Third-party certifications or audits on security practices
- ☐ Other: _____

16. Q14. Do you think **IoT** and **CPS** technologies have a significant impact on privacy in society today?

Mark only one oval.

- ☐ Yes, I believe they have a significant impact
- ☐ No, I don't think they affect privacy much
- ☐ I'm not sure

17. Q15. Would you like to see more information about privacy and data usage in **IoT** and **CPS** systems?

Mark only one oval.

- ☐ Yes, I would appreciate more resources
- ☐ No, I feel well informed
- ☐ Not sure

Section: Device/System Specific Questions

18. Companies may use the collected data for different purposes – some to improve your experience, and others for business or marketing. Based on what you know, how do you think this collected data is typically used? (e.g., service improvement, targeted ads, sharing with utilities, selling to third parties, etc.)

19. Q16. Which types of data are you **comfortable** sharing with IoT manufacturers or third parties regarding **Robot Vacuum Cleaners**? (Select all that apply)

Check all that apply.

- ☐ Floor mapping data: Digital layouts of your home generated during cleaning.
- ☐ Obstacle detection logs: Information on objects detected during navigation.
- ☐ Dust accumulation levels: Frequency and intensity of dust detected.
- ☐ Room usage patterns: Which rooms are cleaned and how often.
- ☐ Camera-based mapping images: Visual data captured for navigation (if applicable).

20. Q17. Which types of data are you **comfortable** sharing with IoT manufacturers or third parties regarding **Smart Air Purifiers**? *(Select all that apply)*

Check all that apply.

- ☐ PM2.5 concentration data: Fine particulate matter readings over time.
- ☐ CO2 level readings: Measurements of carbon dioxide in the air.
- ☐ VOC concentration data: Volatile organic compound readings.
- ☐ Humidity and temperature readings: Environmental conditions logged during operation.
- ☐ Filter status and replacement history: Data on filter health and changes.
- ☐ Air quality trends over time: Long-term environmental monitoring data.

21. Q18. Which types of data are you **comfortable** sharing with IoT manufacturers or third parties regarding **Smart Washing Machines**? *(Select all that apply)*

Check all that apply.

- ☐ Water level data: Measurements of water levels during wash cycles.
- ☐ Load weight readings: Weight of laundry loads recorded by load cell sensors.
- ☐ Vibration intensity readings: Movement levels detected during spin cycles.
- ☐ Temperature readings: Water and cycle temperature logs.
- ☐ Cycle duration history: Time taken for different wash programs.
- ☐ Energy consumption data: Electricity usage during operation.

22. Q19. How **comfortable** are you with sharing your data with IoT manufacturers or third parties regarding **Smart Cleaning Devices**?

Mark only one oval.

- ☐ Extremely uncomfortable
- ☐ Somewhat uncomfortable
- ☐ Neither comfortable nor uncomfortable
- ☐ Somewhat comfortable
- ☐ Extremely comfortable

Section: Privacy Implications

Implications: How Smart Cleaning Devices Use Your Data

Smart vacuums, air purifiers, and washing machines don't just clean—they gather detailed environmental, behavioral, and usage data from your home. This can improve performance, convenience, and energy efficiency, but it may also be shared or monetized in unexpected ways.

◆  **Targeted Recommendations:** Frequent dust buildup? Expect ads for air filters. High pollen detection? See offers for allergy treatments. Long laundry cycles? Get promotions for faster detergents or washer upgrades.

◆  **Data Sharing:** Room maps, air quality readings, and appliance usage data may be shared with manufacturers, advertisers, or home automation partners—sometimes influencing product suggestions or pricing.

◆  **Paid Features:** Advanced mapping, detailed air quality analytics, or predictive maintenance alerts may require a subscription.

◆  **Behavioral Profiling:** Cleaning and appliance usage patterns can reveal when you're home, which rooms are most used, and even lifestyle habits.

◆  **Environmental Tracking:** Air quality sensors detect pollutants, humidity, and temperature—valuable for health insights but also attractive to marketers or research firms.

◆  **Third-Party Access:** Data may be accessed by insurers, building management, or law enforcement in certain cases—sometimes without explicit consent.

What This Means for You:

Smart cleaning devices add convenience and health benefits but also collect a surprising amount of personal and environmental information. Review your privacy settings to see how mapping data, air readings, and appliance logs are stored and shared. If it's sensing, it's logging.

Section: Device/System Specific Questions after Understanding Implications

"After reading *Implications: How Smart Cleaning Devices Use Your Data*, you will be asked the same set of **Device/System Specific Questions** again. Any changes you make will reflect how your views **shifted after learning** about these implications."

23. Q20. Which types of data are you **comfortable** sharing with IoT manufacturers or third parties regarding **Robot Vacuum Cleaners**? *(Select all that apply)*

Check all that apply.

- ☐ Camera-based mapping images: Visual data captured for navigation (if applicable).
- ☐ Room usage patterns: Which rooms are cleaned and how often.
- ☐ Dust accumulation levels: Frequency and intensity of dust detected.
- ☐ Obstacle detection logs: Information on objects detected during navigation.
- ☐ Floor mapping data: Digital layouts of your home generated during cleaning.

24. Q21. Which types of data are you **comfortable** sharing with IoT manufacturers or third parties regarding **Smart Air Purifiers**? *(Select all that apply)*

Check all that apply.

- ☐ Air quality trends over time: Long-term environmental monitoring data.
- ☐ Filter status and replacement history: Data on filter health and changes.
- ☐ Humidity and temperature readings: Environmental conditions logged during operation.
- ☐ VOC concentration data: Volatile organic compound readings.
- ☐ CO2 level readings: Measurements of carbon dioxide in the air.
- ☐ PM2.5 concentration data: Fine particulate matter readings over time.

25. Q22. Which types of data are you **comfortable** sharing with IoT manufacturers or third parties regarding **Smart Washing Machines**? *(Select all that apply)*

Check all that apply.

- ☐ Energy consumption data: Electricity usage during operation.
- ☐ Cycle duration history: Time taken for different wash programs.
- ☐ Temperature readings: Water and cycle temperature logs.
- ☐ Vibration intensity readings: Movement levels detected during spin cycles.
- ☐ Load weight readings: Weight of laundry loads recorded by load cell sensors.
- ☐ Water level data: Measurements of water levels during wash cycles.

26. Q23. How comfortable are you with sharing your data with IoT manufacturers or third parties regarding **Smart Cleaning Devices**?

Mark only one oval.

- ☐ Extremely uncomfortable
- ☐ Somewhat uncomfortable
- ☐ Neither comfortable nor uncomfortable
- ☐ Somewhat comfortable
- ☐ Extremely comfortable

27. Challenges? What you will be missing due to limiting these data accesses?
